Genuine Original Equipment Parts

Ready. Reliable. Right on the Money.

Made to Specifications by Mitsubishi Forklift Trucks

Once you experience the Mitsubishi Forklift Trucks quality, you will never want to compromise. That's why we advise you to service your Mitsubishi forklift trucks with genuine original equipment parts. Your truck will retain its value, continue to perform when you need it and deliver what you expect.

Genuine Parts
Made to precise design specifications from original engineered drawings
Consistent and correct tolerance and material quality
More cost-effective; imitations could mean shorter life and higher cost
Tested and improved for greater performance and reliability
Helps ensure emissions are kept at lowest and safest levels
Lower cost-per-hour operation
Better protection of your investment

With genuine Mitsubishi forklift truck parts, you will get the craftsmanship, quality and performance needed to service your machines. Mitsubishi Forklift Trucks designs its trucks down to the last nut and bolt, so there's no question about fit or function. Contact your local Mitsubishi forklift truck dealer for support.

Insist on Mitsubishi Forklift Truck Parts

Quality • Reliability • Good Value

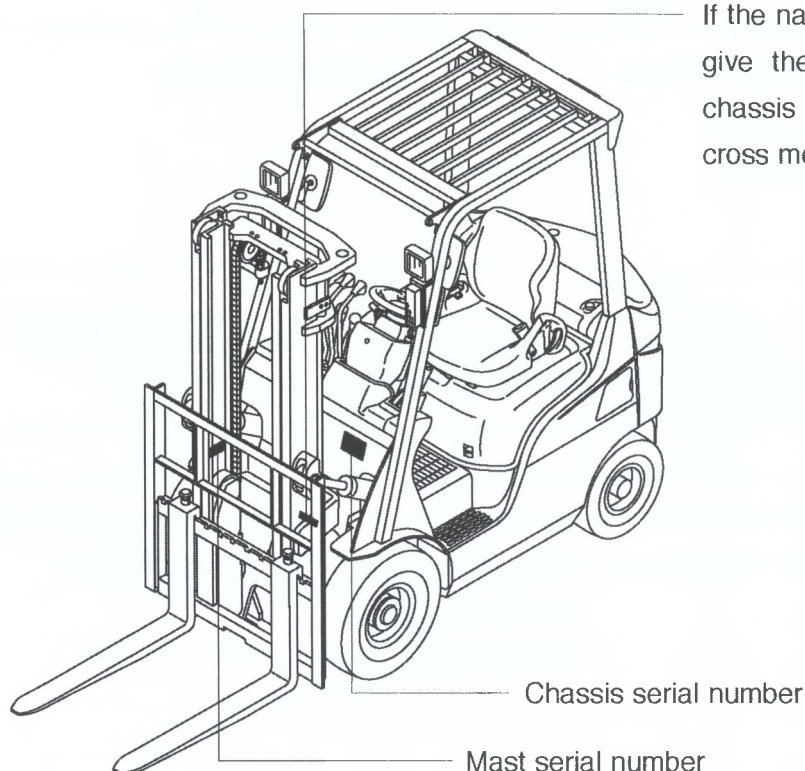

GUIDE FOR USE OF PARTS LIST

1. This Parts List contains complete lists of parts for the following Mitsubishi Forklift Trucks:
FD30N and FD35N.
 - 01 Chassis parts
 - 02 Mast parts
 - 03 Options
 - 04 Internal Hosing
 2. This Parts List is applicable to the initial serial numbers:
FD30N: CF14E-10001-79999
FD35N: CF14E-80001-up
 3. When ordering parts, give your Mitsubishi forklift truck dealer or distributor the following information:
 - a. Part number (or assembly number) and part name
 - b. **Quantity required**
 - c. Model and serial number
-

NOTE

In cases where the ordered parts happen to be out of stock, substitute parts (interchangeable with those ordered) will be supplied.

4. Serial number locations

If the nameplates come off or become illegible, give the Mitsubishi dealer or distributor the chassis serial number punched on the front cross member of chassis.

5. Indication of assembled bolts with washer
Of the standard bolts, those with washers are identified by the symbol "B/W" in the description that follows a part name. (BOLT, W/WASHER B/W)
6. Indication of combination for replaceability –"G"–
The new part to be used in combination with the other part in place of an old part is identified by the symbol "G" in the interchangeability code column of each list.
For the parts to be combined, refer to the listing (beginning with page E1) at the end of the parts list.
7. For the Alpha Index, refer to the page beginning with C1 at the end of the parts list. The Numeric Index follows, beginning with page D1.
8. The parts and part numbers are subject to change without prior notice.

CHASSIS AND MAST IDENTIFICATION

CHASSIS		
Engine Type	Maximum Capacity	Generation Designator
FD	30	N

FB/FBC/FBS = Battery

Capacity in Kilograms

Generation Designator

FG/FGC = Gas or LPG

30 = 3000 kg

FD = Diesel

35 = 3500 kg

MAST				
Major Change	Kind of Mast	Applicable Truck Model Designation	Oder of the Minor Change	Maximum Lifting Height
5	V	30	D	30

2 = First Change

AE = Simplex Mast

30 = 3 Ton Class

A = Original

Height in Millimeters (Inches)

3 = Second Change

V = Simplex Mast

35 = 3.5 Ton Class

B = First Change

30 = 3000 MM (118.2 in)

4 = Third Change

A = Simplex Mast

.....

C = Second Change

(2)

(3)

(4)(5)(6)

(7)

(8)

(9)

(10)(11)

Items (1) thru (11) are as described below:

1. Compiling System

The systems of a unit are grouped according to their location in the unit. The groups, each identified by group number, are listed in the order by CONTENTS. Each group is preceded by an "exploded view" which clearly illustrates each part in its correct relation to the other parts in the illustration.

2. Reference Number (REF NO.)

This number is used to locate a part in the illustration. In cases where the reference number is of three to four figures, the first and second figures show the reference number of an assembly, and the last two figures show the numbers of its component parts.

3. Part Number (PART NO.)

The part numbers shown in this parts list are those assigned to genuine OEM parts.

NOTE

Parts with asterisk (*) are not supplied individually.

4. Interchangeability Code (R/P)

The interchangeability codes used in this parts list are as follows:

PART NO.	CODE (R/P)	DESCRIPTION
A (Old) B (New)	R	B (new part) and A (old part) are mutually interchangeable.
A (Old) B (New)	1	A (old part) is not supplied. B (new part) can be substituted for A (old part).
A (Old) B (New)	3	B (new part) can be substituted for A (old part). [A (old part) cannot be substituted for B (new part).]
A (Old) B (New)	N	B (new part) and A (old part) are not interchangeable.
A (Old) B (New)	G	B (new part) can be substituted for A (old part) in combination with other part(s). (For the parts to be combined, refer to the listing beginning with page E1 at the end of this parts list.)

5. Sequence-of-change Number (SEQ)

The parts are changed for improved quality or performance. Their changes are indicated in sequence by numerals (1,2,3, ...).

- Blank Original
- 1 1st change
- 2 2nd change
- 3 3rd change

6. Change Code (CNG)

These codes indicate the reason or purpose of changes of the parts.

- A Added part (a part entered into service)
- C Change of part number
- D Deleted part (a part applicable up to the date expressed in DATE RANGE column)
- E Added part except above reasons
- Q Change of quantity

7. Part Name and Description

Part Name

Abbreviations are sometimes used in a part name. For the abbreviations, refer to TABLE OF SYMBOLS & ABBREVIATIONS within this general information chapter.

NOTE

The words "left" (L.H.) and "right" (R.H.), when used in this list, are as these directions would appear from the seat facing forward.

Description

- a. Description codes appear after the part name.

B/W Assembled bolt (with washer)

- KIT Part supplied as a kit
- STD Standard part
- OPT Optional part
- AR Part used, as required or by selection or in adjusted quantity for necessity
- SFN Semi-finished part
- GE For gasoline model only
- GLE For dual fuel model
- LE For LP fuel model only

- b. The Description codes in above paragraph (b.) are followed by supplementary explanation, such as dimensions (thickness, length, etc.), manufacturer part number, manufacturer name, etc. as occasion demands.

NOTE

Unless otherwise indicated, the dimensions are shown in millimeter and the name of unit is abbreviated.

(Examples)

Thickness T = 1.00

Length L = 1000

Width W = 1500

Height H = 500

- c. Each specification or type of model and/or selective specifications of a unit are indicated by codes of three figures. For these codes, refer to LIST OF SPECIFICATION CODES within this general information chapter.

NOTE

Unless indicated by the specification codes, the parts may be used for the products of all specifications.

(Examples)

DRY with synchromesh transmission (with dry clutch)

- d. The parts indicated as "NOT SHOWN", such as component parts of repair kit, are not shown in the illustration.

8. Quantity (QTY)

Quantity of part or assembly and its component parts required for one unit of product is indicated.

NOTE

In case "AR" appears in QTY column, it is required to adjust quantity for use.

9. Model and Applicable Date Range

- a. Model Model, type, specification, destination, etc. of the product to which a parts list applies are indicated in the title column of each variation.
- b. Applicable Date Range Dates are used in the FROM and UPTO column to indicate when a part was used on a truck model. If the FROM and UPTO column is blank, the part is applicable to the model.

[Example of approximate date of production]

1999-12	Manufactured in December of 1999
2001-01	Manufactured in January of 2001
2005-06	Manufactured in June of 2005
2010-02	Manufactured in February of 2010
2011-03	Manufactured in March of 2011

NOTE

When placing an order for any of the chassis or mast parts which are classified "N" (not interchangeable) or "G" (interchangeable as an assembly), ask and confirm to our authorized dealer in advance by giving the chassis or mast model name and serial number to choose an applicable part between the new and old parts.

10. Management Rank (M/R)

This ranking is to be referred to by dealers, and is devised to facilitate and rationalize their distribution, stocking and inventory of the parts. Parts ranked as "F" are high-demand parts, "M" are medium-demand parts, and "S" are slow-demand parts.

11. Parts changed or added after the last parts list that has been published are identified by "V."
